of clamp with
AROSuture™*

AROSurgical™ continually provides our AROScamp™ with Training Frame for surgical training. These clamps were specifically designed to aid in training microsurgeons. AROSurgical Clamps are the clamps of choice for surgeons across the United States and around the world!

Our perfect preset closing pressures contribute to successful procedures and aid in the survivability of lab animals, while the cleats on the training clamp aid in teaching surgical techniques during microsurgery training courses. These AROS training clamps come in four variations for your training laboratories.

ITEM	DESCRIPTION	COLOR	VESSEL	PRESSURE	PACKAGING
TKF-5-15g	Double Supra Small w/Frame, Sterile	Green	Vein	15 grams	10 / Box
TKF-5-20g	Double Supra Small w/Frame, Sterile	Green	Vein	20 grams	10 / Box
TKF-5-30g	Double Supra Small w/Frame, Sterile	Yellow	Artery	30 grams	10 / Box
TKF-5-40g	Double Supra Small w/Frame, Sterile	Yellow	Artery	40 grams	10 / Box

The AROScamp™ with Training Frame provides an excellent training experience. The clamps and the frame are in close proximity. This enables the student to suture and still have the clamp and the frame in the field of view. The cleats on the frame allow the student to securely park the suture when turning the frame.

The AROScamp™ with Training Frame is sterile. However, it can be re-used 20 to 25 times without any change in the pressure. This provides a significant savings over the traditional metal clamps in the laboratory setting.
